DETAILED ACTION

1. Claims 5 and 15 are pending in the present application.
2. Claims 5 and 15 have been amended.

Specification

3. The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code [see: page 30]. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.
4. The disclosure is objected to because of the following informalities: the URL cited on page 30 line 4 appear to contain a *typographical error*, note semicolon in URL.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
6. Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not

described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claim 5, the limitation "to a first authorized user-id authorized to access said first data table and prohibits access to said second data table if said user-id does not correspond to a second user-id authorized to access said second data table" does not appear to be described as claimed in the disclosure. Note the newly cited limitation "first authorized" and "second authorized" does not appear to be described in the disclosure. Applicant points to page 7 lines 15-22 and page 32 lines 20-22 for support for this limitation in the response but; the cited passage (page 7) only appear to make reference to multiple levels of access to accommodate a variety of authorized user categories. The examiner notes this is recited only in the summary of the invention and not the detailed description; while cited page 32 does not appear to mention first or second authorized user-id.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 5 the logical connection between the steps are not clear or vague. There does not appear to be a step as to the "potential" process *"if said security*

profile does not correspond to access to said first data table" for step (a) a security corresponding to said user-id whereby said data base management system permits said user terminal to access. Note *prohibiting access* appears to refer only to *second data table* and not *first data table* [see claim 5 step (a); also note steps b-d].

Allowable Subject Matter

9. Claim 15 is allowed.

Response to Arguments

10. Applicant's arguments with respect to claim 5 have been considered but are moot in view of the new ground(s) of rejection. Applicant's amendment to claim 15 overcomes the rejection cited under 35 USC 112 second paragraph.
